ABOUT ME

Computer Science undergraduate (B.Tech 2024–2028) at Lendi College of Engineering with strong fundamentals in Data Structures and Advanced DSA. Proficient in Python, Java, C++, and full-stack web development. Experienced in competitive coding with a solid problem-solving mindset and focus on writing efficient, optimized solutions. Eager to apply technical skills to real-world challenges and grow as a developer.

EDUCATION

CSE (Bachelor of Technology)

Lendi Institute of Engg. & Tech.

2024 – 2028

Class XII (Board of Intermediate)

Apex Junior College

2022 – 2024

Class X (CBSE)

Fort City School

2021 – 2022

EXPERTISE

- C Programming
- Python Programming
- Java
- C++
- DSA and Advanced DSA
- Database Management
- Deep Learning
- Quantum Computing

LANGUAGES

- English (Fluent)
- TELUGU (Fluent)
- HINDI (Fluent)
- Spanish (Intermediate)
- Japanese (Intermediate)
- French (Basic)

PROJECTS

SAARTHI – AI Rail Headway System

2025

Smart India Hackathon | National Level

- Designed an AI-assisted system to optimize railway headway and reduce congestion.
- Developed dynamic scheduling algorithms to regulate train intervals efficiently.
- Simulated peak and off-peak railway traffic scenarios for performance testing.
- Applied predictive logic to minimize delays and improve route efficiency.
- Implemented data analysis to evaluate operational bottlenecks.
- Structured the system for scalability across multiple railway segments.
- Focused on real-time responsiveness and algorithmic optimization.

Quantum State Visualizer

2025

Amaravathi Quantum Valley Hackathon | State Level

- Built a web-based quantum state visualization platform.
- Integrated Qiskit (Python) to simulate quantum circuits and state vectors.
- Visualized probability amplitudes, Bloch sphere states, and measurement outcomes.
- Designed interactive UI for circuit creation and real-time updates.
- Implemented backend logic to process and return simulation results efficiently.

OnLan – LAN Messaging App

2024 – 2025

AWS Hackathon | National Level

- Developed a real-time local network messaging application.
- Implemented socket programming for peer-to-peer communication.
- Enabled multi-user messaging within the same LAN environment.
- Designed lightweight architecture ensuring low latency.
- Integrated basic security mechanisms for message handling.
- Focused on reliability and stable connection management.

ACHIEVEMENTS

- Ranked in the **Top 80% on LeetCode**, demonstrating consistent problem-solving ability.
- **Runner-Up – Ideathon 2025** (State-Level) for innovative solution development.
- **Participated in Andhra University Hackathon**, contributing to collaborative problem-solving projects.
- **Participated in IIIT Srikulam Hackathon**, working on real-world technical challenges.
- **Runner-Up – Competitive Coding Challenge**, showcasing strong algorithmic skills.
